

Información del Plan Docente

| | |
|-------------------------|--|
| Academic Year | 2017/18 |
| Faculty / School | 110 - Escuela de Ingeniería y Arquitectura |
| Degree | 439 - Bachelor's Degree in Informatics Engineering |
| ECTS | 6.0 |
| Year | 4 |
| Semester | Second semester |
| Subject Type | Compulsory |
| Module | --- |

1.General information**1.1.Introduction****1.2.Recommendations to take this course****1.3.Context and importance of this course in the degree****1.4.Activities and key dates****2.Learning goals****2.1.Learning goals****2.2.Importance of learning goals****3.Aims of the course and competences****3.1.Aims of the course****3.2.Competences****4.Assessment (1st and 2nd call)****4.1.Assessment tasks (description of tasks, marking system and assessment criteria)****5.Methodology, learning tasks, syllabus and resources****5.1.Methodological overview**

The learning process of this course is based on:

- The presentation of contents by the professors, and the resolution of exercises in class.
- The personal study by the students and their participation in class in solving exercises.
- The development of practical assignments by the students, oriented by the professors, who will develop the theoretical knowledge acquired.

It must be taken into account that, although the course has a practical orientation, acquiring the needed theoretical knowledge is also required. Therefore, the learning process emphasizes both the theoretical concepts and the individualized study as well as the development of the practical work.

5.2.Learning tasks

The program offered to students to help them to achieve the expected results is composed of the following activities:

- The subject program will be developed in the classroom.
- Problems with concept application and techniques explained in the program of the subject will be solved in special classes dedicated to those problems.
- Practical sessions will take place in computer labs. In such sessions students will develop practical work related to this subject.

5.3.Syllabus

1. Introduction

- What is a videogame?
- Videogames as entertainment industry. Statistics and state of the art.
- Social impact. Electronic leisure
- Impact in other areas. Serious games.

2. Videogames as software projects

- Creativity and design: From an idea to a game
- Videogame companies. The human team
- Production and implementation
- Basic architecture
- Playability adjustment
- Ethics and legislation. PEGI

3. History and evolution of videogames

- Architectures: arcade game machines, computers, game consoles, mobile devices
- Milestone videogames. Main genders
- Evolution of graphics and sound
- Impact of the Internet in videogames
- Game controllers: Videogame interaction
- Videogame preservation

4. Real-time graphics

- 2D and 2.5D graphics
- Introduction to 3D graphics in real-time. GPUs graphic pipelines (traditional and recent alternatives)
- Real time synthetic image generation: transformations, shading models, textures, antialiasing
- Physics (simulation) and animation: basic concepts

5. Artificial Intelligence for videogames

- Review of classic IA techniques
- The Turing Test in the area of videogames
- NPCs: Behavior, personality, and interaction
- Design of controllers: Neural networks and evolutionary computation
- Group techniques: Swarming and learning
- Introduction to advanced techniques

Some of these issues will be the focus of invited talks by professionals from videogames companies.

For more details, visit [the web of the subject](#).

5.4.Course planning and calendar

The calendar of classes, lab sessions, and exams, as well as the dates of presentation of intermediate evaluations, will be announced in advance, according to the sessions and dates established by the School.

5.5.Bibliography and recommended resources

Bibliography

Design and history of videogames:

- Juan A. Estallo, " *Los Videojuegos. Juicios y Prejuicios* ", Editorial Planeta S.A., ISBN 84-08-01291-6, 1995

Videografía (* interesante, ** muy interesante, *** imprescindible)

- Películas:
 - "Tron" (1982) ***
 - "Juegos de Guerra" (1983) ***
 - "Pesadillas; 3ª historia: The Bishop of Battle" (1983) **
 - "Starfighter: La Aventura comienza" (The Last Starfighter, 1984) *
 - "El campeón del videojuego" (The Wizard, 1989) *
 - "Juego mortal" (Brainscan, 1994) *
 - "eXistenZ" (1999) **
 - "Avalon" (2001) **
 - "Stay Alive" (2006) **
 - "Gamer" (2009) *
 - "Tron: Legacy" (2010) **
 - "Scott Pilgrim contra el mundo" (2010) **
 - "Rompe Ralph!" (2013) ***
 - "Pixels" (2015) **
- Documentales:
 - "True Life: I'm a Gamer" (MTV, 2003)
 - "Just a Game" (2004) **
 - "Tetris, desde Rusia con amor" (BBC, 2004) ***
 - "The King of Kong: A Fistful of Quarters" (2007) ***
 - "Chasing Ghosts: Beyond the Arcade" (2007)
 - "Sudor, sangre y videojuegos" (2007) ***
 - Parte I: Poder sobre el mundo
 - Parte II: Poder sobre la mente
 - "La puerta de Sinclair" (Akton Films, 2007) *
 - "Hobby" (Ciro Altabás, 2008) *
 - "Indie Game: The Movie" (2012)
 - "Ecstasy of Order The Tetris Masters" (2012) ***
 - "How Videogames Changed the World" (Channel 4, 2013)
